REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitation(s) of "...an arm member engaged with said disk and coupled to said facial element, rotation of said shaft rotating said disk, which in turn moves said arm member, which imparts movement in a first direction and in a second direction substantially perpendicular to said first direction to said first facial element..." are not anticipated or made obvious by the prior art of record in the examiner's opinion. For example, Marcus et al., Joseph, and Dunner teach different arrangements for the movement of a doll's eyes. Lang discloses an animation device having facial movement and body movement.

However, the prior art fails to teach "...an arm member engaged with said disk and coupled to said facial element, rotation of said shaft rotating said disk, which in turn moves said arm member, which imparts movement in a first direction and in a second direction substantially perpendicular to said first direction to said first facial element..."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
